TWENTY-THIRD

ANNUAL ANNOUNCEMENT

OF THE

WOMAN'S MEDICAL COLLEGE

OF

PENNSYLVANIA,

NORTH COLLEGE AVENUE AND 22d STREET,

PHILADELPHIA.

SESSION OF 1872-3.

PHILADELPHIA:
JAMES B. RODGERS CO., PRINTERS.
1872.

CORPORATORS.

President,
T. MORRIS PEROT.

Secretary,
C. N. PEIRCE.

Treasurer,
REDWOOD F. WARNER.

JOSEPH JEANES,
Hon. WILLIAM S. PIERCE,
REBECCA WHITE,
DILLWYN PARRISH,
J. GIBBONS HUNT, M. D.,
EDWARD LEWIS,
JOHN LONGSTRETH,
MARMADUKE MOORE,
WILLIAM J. MULLEN,
Gen. THOMAS L. KANE,
ELI K. PRICE, Esq.,
A. J. DERBYSHIRE,
ANN PRESTON, M. D.,
E. H. CLEVELAND, M. D.
ISRAEL H. JOHNSON,
MARY S. BROWN.

FACULTY.

ANN PRESTON, M. D.,
Professor of Physiology and Hygiene.

EMELINE H. CLEVELAND, M. D.,
Professor of Obstetrics and Diseases of Women.

MARY J. SCARLETT, M. D.,
Professor of Anatomy.

RACHEL L. BODLEY, A. M.,
Professor of Chemistry and Toxicology.

ISAAC COMLY, M. D.,
Professor of the Principles and Practice of Medicine.

BENJAMIN B. WILSON, M. D.,
Professor of the Principles and Practice of Surgery.

CHARLES HERMON THOMAS, M. D.,
Professor of Materia Medica and General Therapeutics.

HENRY HARTSHORNE, M. D.,
Professor of the Hygiene and Diseases of Children.

J. GIBBONS HUNT, M. D.,
Professor of Microscopy and Histology.

FRANCES E. WHITE, M. D.,
Demonstrator of Anatomy.

ANN PRESTON, M.D., Dean,
1015 *Cherry Street.*

EMELINE H. CLEVELAND, M.D., Sec.,
1800 *Mt. Vernon Street.*

COMMENCEMENT.

The Twentieth Annual Commencement was held at Musical Fund Hall, Philadelphia, on Friday, March 15th, 1872, at 12 M., when the Degree of Doctor of Medicine was conferred by the President, T. Morris Perot, Esq., upon the following named ladies:

NAME.	RESI[illegible]	SUBJECT OF THESIS.
Eliza M. Babb,	Maine,	Mental Influence in the Treatment of Disease.
Elizabeth M. Bertolet,	Pennsylvania,	Rise and Progress of Medicine.
Helen L. Betts,	Ohio,	Erysipelas.
Melissa A. Bradley,	Pennsylvania,	Dietetics.
Amelia Alice Christie,	New York,	Alcohol.
Sarah M. Eddy,	New York,	Pseudo-membranous Croup.
Jane Kimmell Garver,	Pennsylvania,	The Natural History of Disease.
Eliza E. Judson,	Ohio,	Intermittent Fever.
Deborah K. Longshore,	Pennsylvania,	Intermittent Fever.
Sarah R. Munro,	Massachusetts,	The Therapeutic Value of Rest.
Esther L. W. Nippes,	Pennsylvania,	Vesico-Vaginal Fistula.
Frances E. White,	New Hampshire,	Man's Relation to the Physical Forces.
S. Augusta World,	New York,	Scarlatina, its Sequelæ and Treatment.

The Valedictory Address to the graduates was delivered by Henry Hartshorne, M. D., Professor of the Hygiene and Diseases of Children.

ANNOUNCEMENT.

1872.

The Twenty-third Annual Session of the Woman's Medical College of Pennsylvania will open Thursday, October 3d, 1872, and continue twenty-two weeks.

In making this Announcement, the Corporators and Faculty are glad to be able to record the increase of their facilities for extended medical education, as well as the growing prosperity of the Institution. The "Progressive Course" of study introduced three years ago has yielded most satisfactory results.

In the College Announcement, March 1869, the plan was proposed in these words:

"A demand has for a long time existed, both in Europe and in this country, for a system of progressive medical education. The plan now prevalent involves the great evil of "cramming" too many branches at once. For thorough preparation for professional duties, not only is prolongation of attendance at college and hospital important, but a better distribution of time and studies is needed. With this view, we propose to offer to our students the option of adopting a progressive course.

Hereafter, those attending for three years or more, may devote their time altogether during the first year, and in part during the second, to the fundamental branches of Anatomy, Physiology and Hygiene, and Chemistry, theoretical and practical.

Then an examination (whose results are to be recorded by the Secretary of the Faculty), may relieve them of anxiety concerning these branches. The third year may be devoted to the more immediately practical subjects which had been entered upon in the lectures of the second year, including, besides the usual courses upon Therapeutics and Materia Medica, Practice of Medicine, Surgery, Obstetrics, and Diseases of Women and Children, instruction upon ophthalmology, auscultation, and percussion, microscopy, and such other special teaching as the resources of the College and Hospital may afford.

Not only may such a method diminish the excessive labor and mental strain inseparable from attendance on seven or more parallel courses of lectures at one time, but the more deliberate plan of study will favor thoroughness and maturity of knowledge."

We have now tested this progressive order of study, for three years, and find its practical workings to more than justify our anticipations. Each year a number of students have availed themselves of its advantages, and the effect has been shown, not only in the fact that they have retained their health and nervous vigor, but that they have gained in mental training and in clearness of knowledge.

The old rules still prevail for those who desire to pursue their studies on all the branches at once.

The "Spring Course" of instruction, instituted last year, was designed, not for didactic teaching, but to afford students opportunities for more varied practical knowledge than can be obtained during the winter term of lectures, as well as for examinations on the subjects then taught. This course has in the present year, been extended and more fully organized.*

* See "Spring Course," page 8.

Instruction in microscopy, under the charge of Dr. J. Gibbons Hunt, has become a decided feature of our College teaching. Not only have the students thus been made acquainted with the minute structure of organic tissues, and contrasted their pathological with their physiological conditions, but they have also been enabled to observe for themselves, some of the recondite and marvelous processes of life itself.

Practical Laboratory work, including Toxicological Analysis and Urinalysis, has been made a feature of the exercises of the last session; and as there is a prospect of more improved laboratory accommodations, this department of instruction promises to take an important place in the exercises of the College.

Extended clinical facilities are now open to our students on every side. The opportunities at the Woman's Hospital have been more fully methodized than heretofore, the rich wards of the Pennsylvania Hospital have been visited weekly, during the session, while the dispensary in Bedford Street, established a year ago, under the immediate medical charge of a graduate of this school, has furnished excellent advantages to a few of our class. Wills' Hospital, for diseases of the eye, still receives our ladies kindly, and the new "Orthopædic Hospital and Infirmary for Nervous Diseases," we are assured, will add to their clinical advantages.

While thus the Corporators and Faculty review with pleasure the improvements already made, they are determined to spare no efforts to increase the appliances of the College, and to make it more worthy of the great cause it represents, and on a level with the most advanced methods of teaching of the age.

SPRING COURSE.

1872.

The Course will commence Monday, March 18th, 1872, and continue ten weeks. It is designed to supplement the instruction of the winter course.

Price of Ticket (covering all instruction except Practical Anatomy,) $25.00.

SCHEDULE OF INSTRUCTION.

SPRING COURSE.

DENTAL PHYSIOLOGY AND PATHOLOGY.
(Lectures.)

PRACTICAL CHEMISTRY.
Including Toxicological Analysis and Urinalysis.

BOTANY.
(Lectures and Practical Studies.)

PHARMACY.
(Lectures and Practice.)

AUSCULTATION AND PERCUSSION.
(Practice.)

BANDAGING.
(Practice.)

REGIONAL ANATOMY.
(Lectures.)

PRACTICAL ANATOMY.
(Dissection.)

CLINIC.
(Ophthalmic.)

CLINIC.
Surgical—with especial reference to Surgical Diseases of Children.

CLINIC.
Diseases of Women and Children.

Dispensary Service (Daily) in Women's Hospital.

Examinations on the Topics of the Winter Lectures.

REQUIREMENTS FOR GRADUATION.

1. The candidate must have attained the age of twenty-one years, and must possess respectable literary attainments.

2. The candidate must have been engaged in the study of Medicine three years, and been during that time the private pupil for two years at least, of a respectable practitioner of Medicine.

(Six months spent in a hospital will be considered equivalent to one year's study under a medical practitioner. The Spring Course of Instruction will be reckoned to those who avail themselves of it in addition to the regular winter's course of lectures, as equivalent to one year with a preceptor.)

3. The candidate must have attended two courses of Lectures on the following subjects :—

Chemistry and Toxicology.
Anatomy and Histology.
Materia Medica and General Therapeutics.
Physiology and Hygiene.
Principles and Practice of Medicine.
Principles and Practice of Surgery.
Obstetrics and Diseases of Women and Children.

She must also have taken one course of instruction in Practical Anatomy. The two courses of lectures must have been attended in different years, and one at least in this College.

4. The application for the degree must be made six weeks before the close of the session. The candidate, at the time of application, must exhibit to the Dean evidence of having complied with the above require-

ments; she must also present the graduation fee, and a thesis on some medical subject of her own composition and penmanship.*

5. In addition to the above requirements, the Faculty claim the right to refuse examination to an applicant on the ground of what they deem to be moral or mental unfitness for the profession.

6. Graduates of more than five years' standing of other medical schools, approved by this, will be admitted to the lectures free of expense, except the cost of the matriculation ticket, unless they should desire to graduate, in which case they will be expected to comply with the terms required of second course students.

---

* To such students as attend three sessions or more, the option is offered of the division of the final examination for the Degree of Doctor of Medicine as follows:

a. A first examination, which may take place after attendance upon two courses of lectures on Chemistry, Anatomy, Physiology and Hygiene, and to include these branches: the result of which examination shall be recorded by the Secretary of the Faculty.

b. A second examination, which may occur after the remaining requirements of Rule Fourth (see Requirements for Graduation), shall have been fulfilled, and which shall embrace the remaining portion of the curriculum. The result of this second examination, added to the recorded result of the first, shall constitute the final vote of such candidate. This second examination must take place within three years after the record of the first examination.

TERMS.

THE FEES ARE AS FOLLOWS.

	First Year.	*Second Year.*
Matriculation Ticket	$ 5 00	$ 0 00
Professors' Tickets	105 00	105 00
Practical Anatomy	8 00	8 00
Graduation Fee		30 00
(Single Ticket, $15 00.)		
No fee for Lectures after the Second Course.		
Whole cost for two or more courses of Lectures and Graduation		$261 00

Each student must exhibit her tickets to the Dean within six weeks from the commencement of the Session.

For the encouragement of capable and well-educated women, whose means will not allow of the usual expenditure, six students will be admitted annually, on the payment of twenty dollars for the Session—exclusive of matriculation, the demonstrator's and graduation fees. Such arrangements will be strictly confidential, and no distinction will be made in point of courtesy between the beneficiary and other students.

Ladies wishing to be received on this basis, must forward to the Dean, at least thirty days before the opening of the Session, application in their own handwriting, accompanied by satisfactory testimonials as to character, age, qualification, and want of means. The applicant must be not less than twenty, nor more than thirty-five years of age. The successful candidates will be duly notified.

It is deemed well to suggest to those ladies who may contemplate entering college, the advantage of consulting, at once, with some reliable physician, who may be able to give systematic direction to their course of study, and furnish testimony, when required, in regard to the time in which they have been thus engaged.

Any lady who does not incline to become a physician, yet desires instruction in some of the branches taught in a Medical College, as a

part of a liberal education, may take the tickets, and attend the Lectures of any one or more of the Professors.

Board can be obtained convenient to the College, for prices varying from $3 50 to $6.00 per week.

Communications should be addressed to the Secretary of the Faculty,

MRS. E. H. CLEVELAND, M. D.,
1800 *Mount Vernon Street.*

The following are recommended by the Faculty as Text Books and Works of Reference:

CHEMISTRY.—Fownes (edition 1869), Attfield, Miller, Roscoe, Odling's Practical Chemistry. Taylor on Poisons.

PRACTICE OF MEDICINE.—Wood, Flint, Hartshorne, Da Costa.

PHYSIOLOGY.—Dalton, Marshall, Flint, Carpenter.

ANATOMY.—Gray, Leidy.

OBSTETRICS.—Cazeaux, Bedford, Hodge, Meadows.

DISEASES OF WOMEN.—Scanzoni, West, Hewitt, Thomas.

DISEASES OF CHILDREN.—West, Meigs.

SURGERY.—Ashurst's Principles and Practice.

MATERIA MEDICA AND THERAPEUTICS.—Stillé, Wood, Biddle, U. S. Dispensatory, Parrish's Practical Pharmacy.

LIST OF MATRICULANTS.

Session 1871-72.

Name.	Residence.
Adams, Anna S.,	Cambridge City, Ind.,
Aldrich, Olive D.,	Rochester, N. Y.
Alcott, Alice J. C.,	Port Chester, N. Y.
Alton, Helen C.,	Burlington, N. J.
Babb, Eliza M.,	Eastport, Me.
Baker, Frances N.,	Media, Pa.
Barton, Amy S.,	Greene, N. J.
Barker, Mary H.,	Waterloo, Wis.
Blake, Martha C.,	Granville, Ill.
Bradley, Melissa A.,	Philadelphia.
Branson, Mary	Philadelphia.
Betts, Helen L.,	Vienna, O.
Bertolet, Elizabeth M.,	Oley, Pa.
Benedict, Celestia A.,	Newtown, Conn.
Blehl, Mary,	Philadelphia.
